RING BOLT is a strong deterrent to forced entry of single doors in your home or apartment. It also eliminates danger of pass key entry. You control your own security with **RING BOLT**, and it releases quickly in case of emergency. An upward motion with the security chain gives quick release.

Remember: A dead bolt is only as strong as the door and frame that hold it, but the **RING BOLT** is anchored into the door frame stud in your wall and gives your door the strength of the wall itself.
